- Supporting in due diligence for early-stage investments, including founder interviews and market analysis, directly contributing to investment committee decisions.
- Delivering strategic support to a deep tech portfolio company, optimizing sales and marketing strategies while actively representing the fund at startup events for deal sourcing.
- Supporting in consulting project for a global top 5 retail company to develop and implement an international startup scouting strategy, partnering with global top-tier venture capital firms.

Stealth, Munich

Aug 24 – present

Founder (Side Project)

- Developing MVP user interface for AI agent swarms, with the goal of reducing research time and costs by 95% for qualitative research and data enrichment/extraction tasks.
- Designing and validating the business concept through an iterative process, assessing desirability, feasibility, and viability in the AI and research optimization space.
- Developing a preliminary business case with value propositions for reducing research time and costs, while exploring potential applications and market fit.

MING Labs GmbH (temporary via Exxeta AG), Munich

Apr 24 – Jul 24

Full-time Venture Builder for Leading Energy Provider in Germany

- Strategic opportunity discovery, crafting hypotheses and identifying potential ventures aligned with client's value chains, particularly in the focus sector BaaS (Battery-as-a-Service).
- Managed and conducted the design and validation of selected business opportunities from concept to initial traction, using a structured, iterative process to assess desirability, feasibility and viability.
- Developed comprehensive business cases with hypotheses and value propositions, while orchestrating the recruitment of a founding team for new venture.

Wemolo GmbH (prev. Parkdepot), Munich

May 23 – Sep 23

Intern in Product Department of one of the Fastest Growing AI Scale-ups in Europe

- Independent feature conception and development for small payment-related and user-facing applications, gaining experience in technical development and product management.
- Assisted in the implementation of process improvement initiatives, review and renegotiation of supplier contracts, contributing to cost savings of <€100k.
- Managed cross-cultural communication and support in streamlining product management-related processes with expansion countries (DK, IT, AT, CH) in new markets.

Exxeta AG, Berlin

Oct 22 – May 23

Intern for Digital Strategy & Management Consulting in a Leading Mid-Sized IT & Strategy Consultancy

- Supported in digital strategy client projects in mobility, real estate, and banking sectors, with market analysis, tech trend identification, customer interviews and creation of management & sales presentations.
- Assisted in product development lifecycle processes, from concept to launch, learning design thinking and agile methodologies within cross-functional teams.
- Gained exposure to non-strategic CVC fund operations, learning about startup evaluation and investment decision-making processes.

IAV GmbH, Berlin/Konstanz

Sep 20 – Jul 22

Intern/Student Trainee & Thesis Candidate in Corporate Foresight of Leading International Engineering Provider

- Performed trend & technology scouting and market analysis across strategic sectors including mobility, agriculture, energy, and AI, delivering actionable insights to long-term corporate vision.
- Contributed to strategic projects at CEO and Management Board level, helping translate emerging trends and technologies into internal innovation opportunities.
- Conducted in-depth scenario planning for AI's future in automotive, encompassing autonomous driving, vehicle user interfaces, and R&D in a forward-looking bachelor thesis.

Additional Experience & Initiatives

HAW.international Scholarship with Stay Abroad

- Conducted 2-month research stay in Botswana, Africa, focusing on the assessment and feasibility of vertical farming concepts for the "Maun Science Park" research project with secured scholarship.
- Developed and presented a comprehensive report on sustainable agricultural practices tailored to Botswana's climate, contributing valuable insights to the ongoing development of the Maun Science Park initiative.
- Collaborated closely with a diverse group of local and international partners, including Stockholm University, TU Munich, the Republic of Botswana, and the German Federal Ministry of Education and Research.

Voluntary Initiatives

- *Bodensee Racing Team (Formula Student)*: Led finance department of HTWG Konstanz's Formula Student racing team, developing project management skills through budgeting, resource allocation, and coordinating projects.
- *innovate@lake*: Active member of a university group at the University of Konstanz focused on innovation and entrepreneurship, gaining valuable insights into the local startup ecosystem.
- *IW Junior Student Company*: Co-founded and operated a real-world student company during upper school, developing practical entrepreneurial skills and gaining hands-on experience.

Different Entrepreneurial Projects

- Building GenAI VC Copilot with AI market research agent, implemented in internal CRM of Exxeta Ventures to enhance initial startup screening and decision-making to streamline due diligence processes.
- Co-founded smart lighting solutions startup utilizing additive manufacturing techniques, which evolved from a school student company project (closed in 2019).
